

ASSEMBLY INSTRUCTIONS

Bedhead Brackets Pair

Please read instructions carefully. Remove all wrapping material, staples and packing straps from the carton. See hardware and furniture parts list for guidance. Be sure you have all parts before you start to assemble product. Place all furniture parts on a clean flat surface, such as carpet or rug to prevent from being scratched.

PARTS INCLUDED

A 2x metal bedhead brackets

HARDWARE LIST

- A** Small screws
- B** Long Bolts
- C** Nuts
- D** Washers

FOR ASSEMBLY

1. Turn bed base onto its side and unscrew both bed base feet (the ones closest to where the bedhead will be positioned).
2. Hold bedhead brackets against the bed base (in line with the bed feet/castors) and refit the foot/castor through the slot in the bracket. Use the larger slots and larger side of the bracket for this.
3. Place bed base into the normal position on the floor to establish position of bracket in relation to bedhead. Make small markings in pencil on the bedhead where the small drill holes will be required for mounting.
4. Remove feet and brackets from bed base.
5. Drill holes in bedhead where you had marked out previously. Insert 3 small screws into each bracket, and screw securely into the bedhead.
6. Position the bed base in place against the bedhead/brackets, and now refit the foot/castor back through the bracket into the bed base and tighten firmly. For extra support, additional screws (not supplied) can be used in the remaining bracket holes.
